

## Step 1 (Input Race Number)

1. Use record minor assistance to document minor care such as :
  - Band-aids
  - Biofreeze,
  - Ice
  - Vaseline etc.
2. To document more extensive care or view runners medical history
  - Select Search Medical Profile and proceed to Step 2

## Step 2 (Document Care)

1. View Patients Medical history (If Provided)
2. Select Providing Care

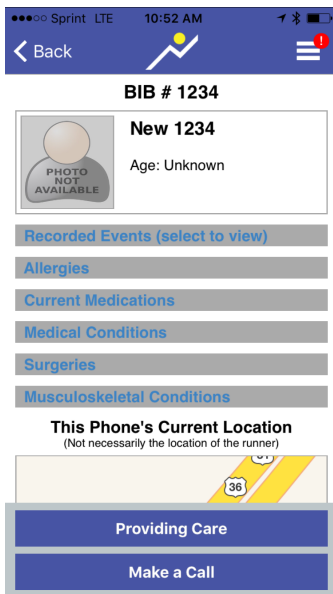

## Step 3 (Document Care)

1. Select MSK for :
  - Ankle Sprains
  - Shin Splints
  - Hamstring strains
  - Suspected fractures Etc.
2. Select Medical for:
  - Asthma
  - Fatigue
  - Heat Illness
  - Cramps
  - Dehydration etc.

TIP:

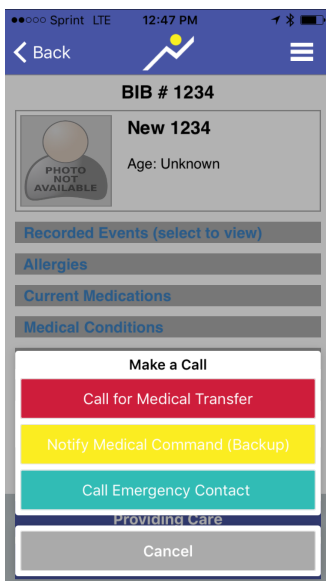

If your Diagnosis , Symptom, Physical Finding, or Treatment is not listed you can select Add Note and freeform enter text

## Step 4 (Call Medical Command)

(Only if transportation needed/otherwise got to step 6)

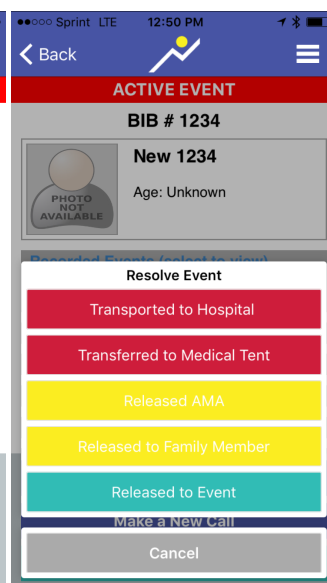

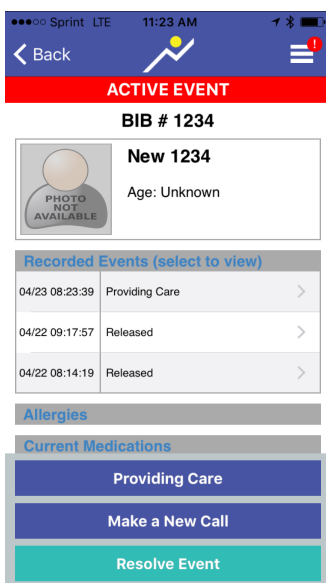

- Select: Make A New call
- If no transportation is needed and runner is going to continue proceed to step 6

## Step 5 (Call Medical Command)

(Only if transportation needed/otherwise got to step 6)

1. If participant needs transportation select Call for Medical Transfer
2. Then use 2 way radio to call Medical Command.
  - By pushing Call for Medical Transfer, this allows Medical Command see your location
3. Notify Medical Command is to be used as a backup to call if 2 way radio communication is unavailable
  - It will Call Dr Daggy's cell phone

## Step 6 (Resolve Event)

1. After participant is transferred to another provider (eg First Aid Station to Van) then resolve event.
2. Do not resolve event until transfer of participant occurs.
  - This allows Medical Command to monitor to your location until transfer takes place

TIP: When discharging back to participate in race select RELEASED TO EVENT
